

## WELCOME TO ZOOMBERS!

Thank you for trusting on the best way to Learn Mathematics while playing.

Read this manual and familiarize yourself with all the tools we have.

You can always enter to our web portal:

[PORTAL.ZOOMBERS.COM](https://portal.zoombers.com)

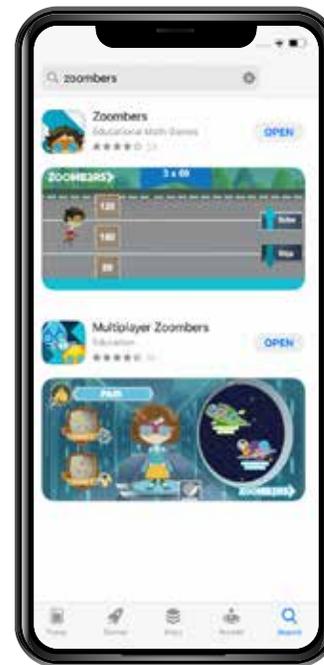

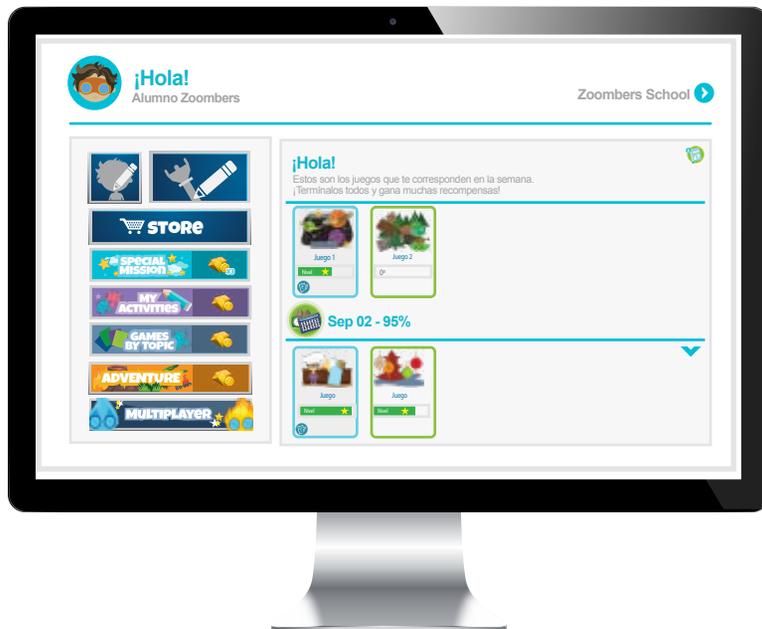

Remember that students, in addition to the web portal, they can also play Zoombers from any iOS or Android mobile device:

Download on the  
App Store

GET IT ON  
Google Play

Zoombers App:  
See the school homework, games, daily challenge, etc.

MULTIPLAYER  
Zoombers App:  
Multiplayer to compete and collaborate, using the same username and password assigned by the school.

Once inside, enter the username and password  
**assigned by your school to log in.**

## >>> GENERAL VIEW

The first thing you will find is a window with a main menu.

Students will be able to customize their avatar, choose a master, and start playing assigned tasks to the school program.

**ADVENTURE**

**MULTIPLAYER**

**Welcome!**  
These are the games that correspond to you in the week.  
Finish them all and win lots of rewards!

Game 1  
Level ★

Game 2  
Level 0%

Sep 02 - 95%

Game 3  
Level ★

Game 4  
Level ★

**GAMES**  
You can view assigned games as homework during the current week.

You can see the weeks and games of the school year, indicating progress.

**Special Mission**  
Zoombers identifies the skills of each student and, through artificial intelligence, the game offers a challenge in order for them to keep improving. Their reward will be tripled if they accept the challenge.

**MULTIPLAYER**  
Compete and play with other students (whether in class or in tournaments)!

## PERSONALIZATION

### MASTER

It will be necessary to select your favorite master:

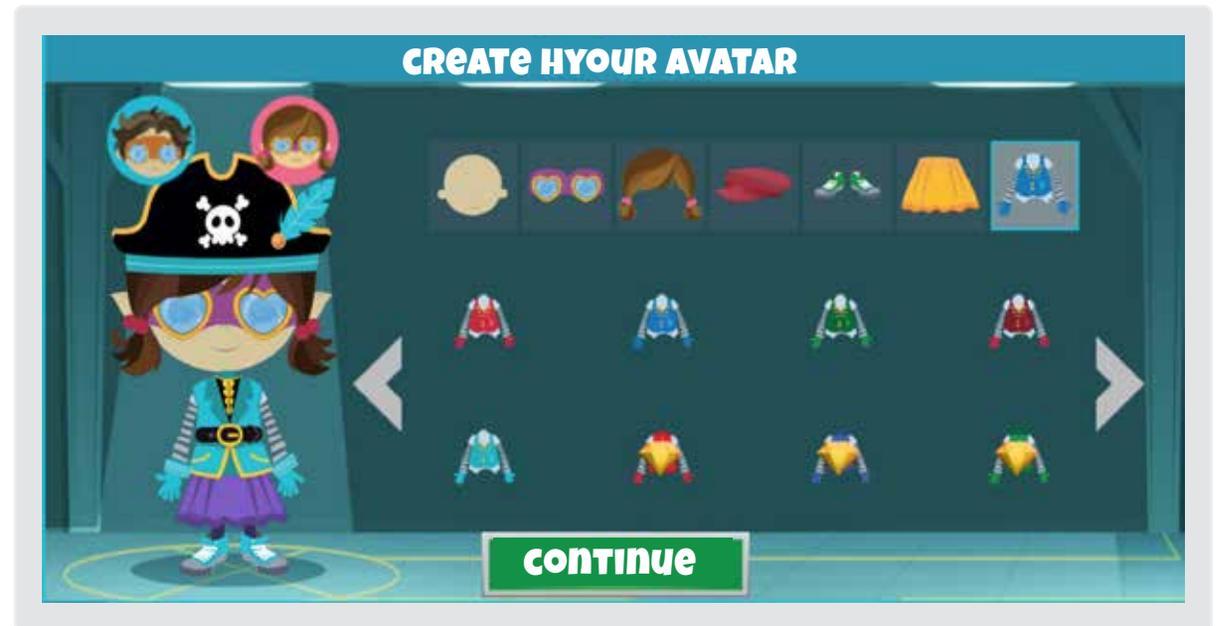

The student can choose the one he likes the most. The element to which it belongs will be helpful later with Zoombers power ups.

### AVATAR

When you enter for the first time, Zoombers will offer to customize an Avatar

The student must select the assets that they like the most for their character, and click on the Continue button. By overcoming levels and challenges, you can access new assets for the avatar and change it as many times as you want.

## GAMING EXPERIENCE

### LEVELS AND INSTRUCTIONS

All games have 10 levels of complexity, which increases as they progress.

When starting the first level there is an instructions screen, which you can consult at any time, by clicking on the button at the bottom right with a sign of a question mark.

Start the game by clicking on the level number!

Every time the student advances in the games, they are rewarded with coins and gems that are used to buy items for their avatar and to acquire or improve powers, which help to advance in each game.

#### WATER

Freezes certain objects to help them make better decisions.

#### WIND

Gives them extra time to solve challenges.

#### EARTH

Allows them to make mistakes without having to repeat the level.

#### FIRE

Gives them a clue.

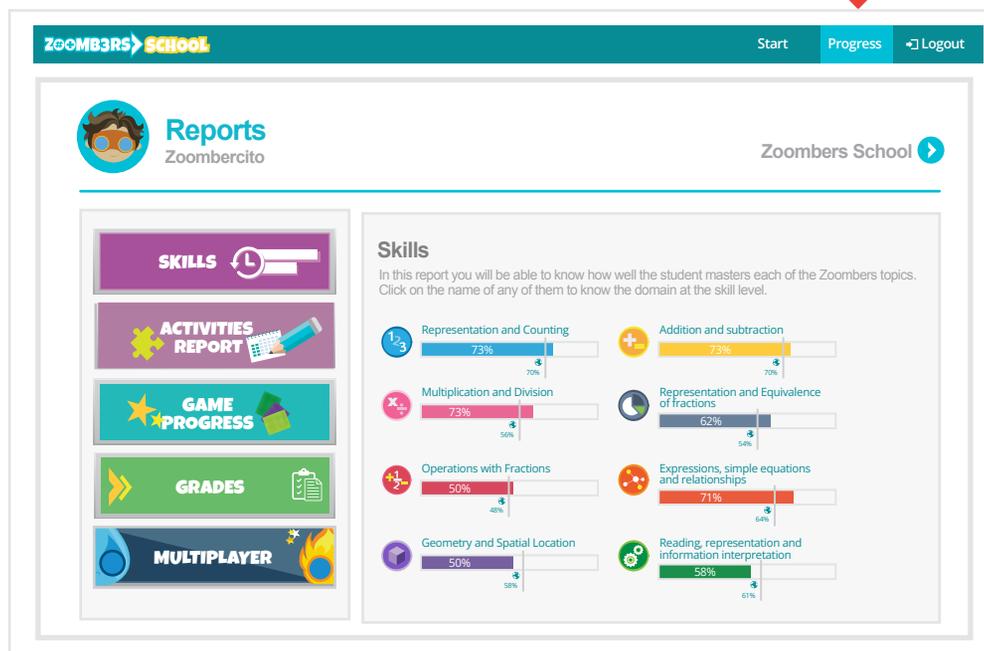

To activate these powers, you must click on one of the icons at the top to find out what it does and how it can help in-game.

It is important to mention that the powers associated with the initially chosen master will cost less coins.

## PROGRESS

You can see the student's progress through reports that we have prepared for you. Look at the top right menu and click on Progress.

### SKILLS

It presents two types of data, in a general and detailed way for each topic.  
 1. How much does the student master that topic in general.  
 2. The average of other students of the same age  
 By clicking on each topic you will see a detail of progress by skill.

### HOMEWORK REPORT

It shows the progress in the assigned tasks week by week:  
 Precision - It is related to the difficulty when performing the exercises  
 Progress - Relates to progress within the game

### GAME PROGRESS

Features the trailer within all related games in each theme. It's a simple way identify what content needs to be reinforced in each topic.

### GRADES

It offers grades regarding the progress within the games.  
 If the grade is low, it can be increased by progressing through pending games that have been assigned to the student.

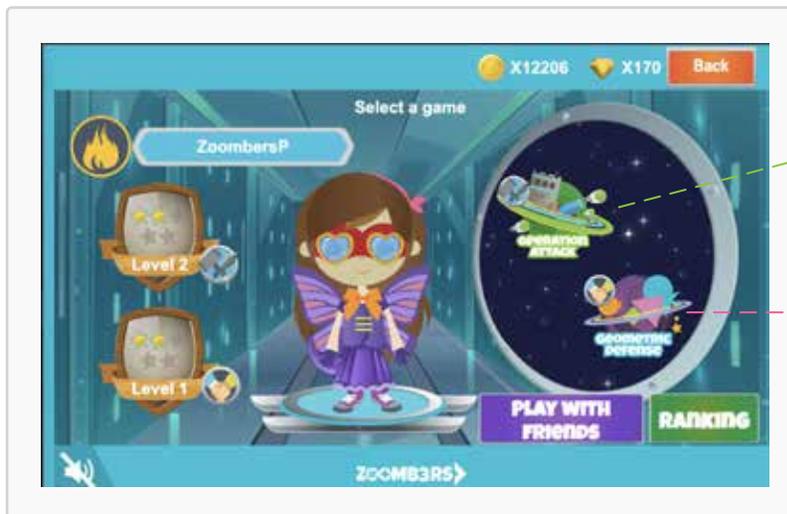

### MULTIPLAYER

Presents a summary of online games and how much you have played week by week the student.

## MULTIPLAYER

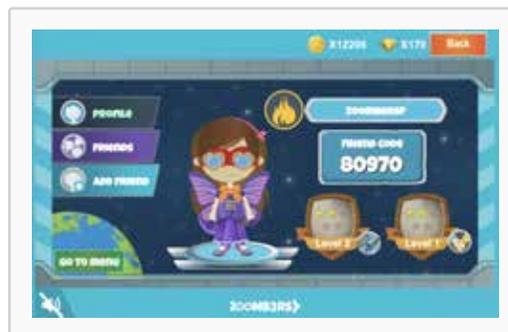

With multiplayer, students will be able to challenge and collaborate with their classmates, as well as add friends.

**OPERATION ATTACK / COMPETITION:**  
Shows the students level in the Number Shooting Competition (the maximum being level 25).

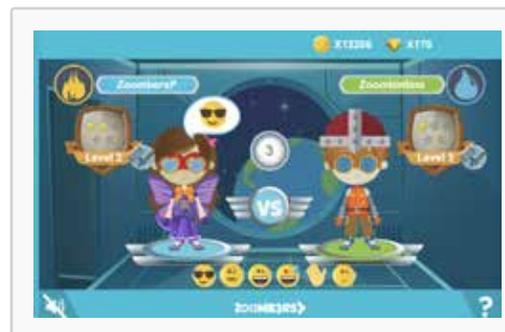

**GEOMETRIC DEFENSE / COLLABORATION -**  
The students level in the game of Geometric Defence Collaboration (the maximum being level 25).

### ADD FRIENDS

With their code number they can add their teammates to challenge directly.

### EMOJIS COMMUNICATION

They can safely express themselves with emojis without exchanging information.

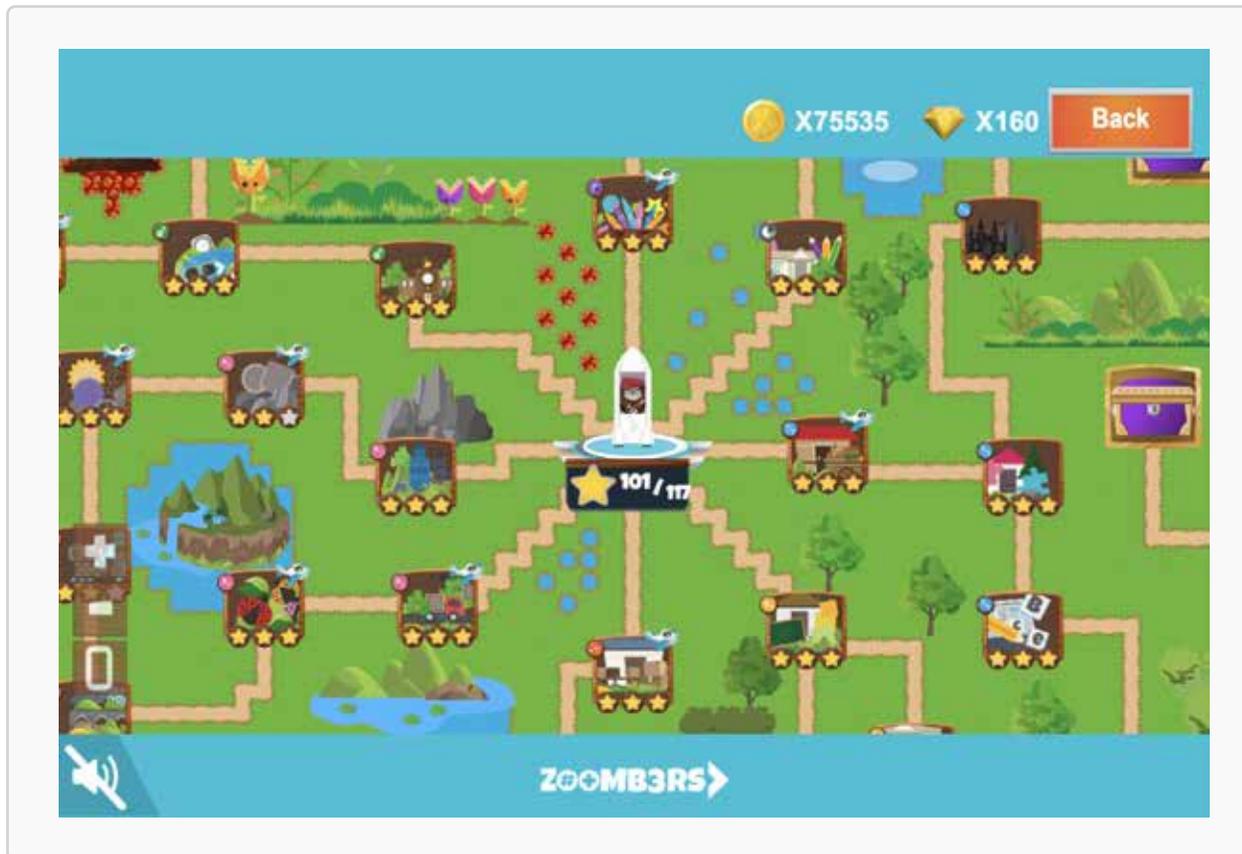

### OPERATION ATTACK

During the competition game they will be able to attack by throwing a question, and defend themselves by answering the operations that are presented to them, the winner will be the one who keeps their lives by hitting more times than their opponent.

Adventure Mode Preview

Adventure Mode: Allows students to browse the content through a fun guided view. Available only with teacher permission.
